اتفاقية حقوق الطفل

المادة 42

تتعهد الدول الأطراف بأن تنشر مبادئ الاتفاقية وأحكامها على نطاق واسع بالوسائل الملائمة والفعالة، بين الكبار والأطفال على السواء.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.3 billion. The number of people aged 15 years and over has increased from 3.5 billion to 4.5 billion. The number of people aged 65 years and over has increased from 0.2 billion to 0.5 billion.

There are a number of reasons for the increase in the number of people in the world. One of the main reasons is the increase in the number of people who are surviving to old age. This is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the number of people who are dying from infectious diseases.

Another reason for the increase in the number of people in the world is the increase in the number of people who are having children. This is due to a number of factors, including a decline in the number of people who are dying from infectious diseases, a decline in the number of people who are having abortions, and a decline in the number of people who are using contraception.

The increase in the number of people in the world is a major challenge for the world's governments. They need to find ways to provide for the needs of the growing population, including food, water, and shelter. They also need to find ways to provide for the needs of the elderly population, including health care and social security.

The increase in the number of people in the world is also a challenge for the world's environment. The growing population is putting increasing pressure on the world's natural resources, including forests, water, and land. This is leading to a number of environmental problems, including deforestation, water scarcity, and soil erosion.

The increase in the number of people in the world is a challenge for the world's economy. The growing population is putting increasing pressure on the world's economy, including a decline in the number of people who are working and a decline in the number of people who are paying taxes. This is leading to a number of economic problems, including unemployment and a decline in the standard of living.

The increase in the number of people in the world is a challenge for the world's culture. The growing population is putting increasing pressure on the world's culture, including a decline in the number of people who are practicing their traditional religions and a decline in the number of people who are speaking their traditional languages. This is leading to a number of cultural problems, including a loss of cultural identity and a decline in the number of people who are practicing their traditional religions.

The increase in the number of people in the world is a challenge for the world's future. The growing population is putting increasing pressure on the world's future, including a decline in the number of people who are working and a decline in the number of people who are paying taxes. This is leading to a number of future problems, including unemployment and a decline in the standard of living.

The increase in the number of people in the world is a challenge for the world's health. The growing population is putting increasing pressure on the world's health, including a decline in the number of people who are practicing healthy lifestyles and a decline in the number of people who are getting regular medical care. This is leading to a number of health problems, including a decline in the number of people who are practicing healthy lifestyles and a decline in the number of people who are getting regular medical care.

The increase in the number of people in the world is a challenge for the world's education. The growing population is putting increasing pressure on the world's education, including a decline in the number of people who are attending school and a decline in the number of people who are getting a good education. This is leading to a number of education problems, including a decline in the number of people who are attending school and a decline in the number of people who are getting a good education.

The increase in the number of people in the world is a challenge for the world's social services. The growing population is putting increasing pressure on the world's social services, including a decline in the number of people who are receiving social services and a decline in the number of people who are getting a good social service. This is leading to a number of social service problems, including a decline in the number of people who are receiving social services and a decline in the number of people who are getting a good social service.

The increase in the number of people in the world is a challenge for the world's peace. The growing population is putting increasing pressure on the world's peace, including a decline in the number of people who are practicing peace and a decline in the number of people who are getting a good peace. This is leading to a number of peace problems, including a decline in the number of people who are practicing peace and a decline in the number of people who are getting a good peace.
